

DANILO NOGUEIRA

Software Engineer
Frontend

PERSONAL PROFILE

Passionate about software engineering. I enjoy being involved in the product's creation process and applying my tech expertise to give life to those products.

PERSONAL ACHIEVEMENTS

I took on the challenge of building an entire admin system from the ground up for the company. The system was widely used, managing more than 1000 companies, including Hyundai, KPMG and Ifood, some of them with more than 40 thousand employees.

SKILLS & INTERESTS

- Vue JS
- Javascript
- Typescript
- React.JS
- Vite / Webpack
- Microfrontends
- Jest

WORK EXPERIENCE

Frontend Engineer

Gupy, 2022 - July 2023

- The initially offered core service was not fulfilling all the client's demands. In order to increase the retention my team suggested a rework of the core features from our main product. Worked on the administrative aspect of this new feature increasing clients retention on the platform. Also, delivered a new feature on the web app for dynamic content for the users, and also made a dashboard to show the user data collected.
- Key skills: Vue.JS, Vuex, Firebase, Typescript, Webpack, Jest, Git, BEM Notation, Sass, Clean Architecture, GraphQL

Frontend Engineer

Niduu, 2018 - 2022

- One of the biggest challenges for the company when I arrived was to manage both the clients and their users on the platform. I proposed and introduced web app to fulfill all their needs, delivering a robust application containing reports with dynamic charts, spreadsheets and many other features. Oftentimes, did remote/in person presentations to our clients. The system helped the company to seal many deals with new clients resulting in the company's growth and positively impacting the clients experience.
- Key skills: Vue.JS, Vuex, Firebase, Typescript, Webpack, Microfrontends, Single-spa, Jest, Git, BEM Notation, Sass, Clean Architecture, GraphQL

Backend Engineer

UNA-SUS/UFMA, 2015 - 2017 (part time)

- Worked on maintaining an educational platform that provided free specialization, improvement, training and extension courses in the health area using moodle. It was my first experience with PHP backend and MySQL databases, also worked on internal systems using AngularJS.
- Key skills: PHP, Laravel, Zend, Angular JS, Node.JS, JQuery, Git, HTML, CSS

Internship

Big Data University (2014)

- WEB application developer for the new BLUEMIX platform.
- Key skills: HTML, CSS, Javascript

Extension Project at UFMA (2013)

- Worked on a learning platform using moodle, focused on remote learning. It was my first contact with the web development world.
- Key skills: HTML, CSS, Javascript

ACADEMIC BACKGROUND

University of Toronto (UofT)

Academic Mobility by Science Without Borders (2014-2015)

Universidade Federal do Maranhão (UFMA)

Bachelor's Degree in Computer Science (2011.2 - 2017.2)
